

Flow Robotics A/S
Glentevej 70A, st. tv.
2400 København NV

Hvidovre, Wednesday the 6th of March 2024

Dear to whom it may concern,

I am writing to express my keen interest in the Software Engineer position at Flow Robotics, as advertised on Jobindex. As a recent graduate in Computer Science with a specialization in Software Engineering, I am excited about the opportunity to contribute to your innovative projects, particularly in the realm of lab automation.

Flow Robotics' mission to revolutionize the liquid handling robot market resonates deeply with my passion for automation solutions. The prospect of joining a dynamic team dedicated to establishing a Danish scale-up company as a key player in the lab tech world is incredibly inspiring. I am eager to leverage my skills and knowledge to contribute meaningfully to this mission.

Throughout my academic journey, I have acquired a strong foundation in coding and software development, with hands-on experience in various technologies relevant to the role. My coursework and school projects have provided me with exposure to languages such as Python and Java, and frameworks like Flask and Spring Boot. Additionally, I have honed my skills in MySQL and Git which I believe are crucial for success in this role.

I had Python as an elective in the fifth and last semester, where it was used to develop software for a real customer for my final assignment with Flask as a web framework. In addition, I have also been exposed to the Pandas software library, which is written for Python, in connection with data structuring and manipulation of numerical tables and time series.

I am enthusiastic about the possibility of joining your team and would welcome the opportunity to further discuss how my skills and experiences align with the needs of Flow Robotics. Thank you for considering my application.

Cem Akay Türker
